I'm a software engineer with several years of professional experience building bespoke web applications, mobile applications, and back-end software systems. I have experience working within and leading scrum development teams working on several projects for a wide variety of clients. In my personal capacity, I have released several open-source software projects. I have been closely involved with technical training programmes for developers.

Professional experience

- **cargo.one** **Berlin, Germany (fully remote from Cape Town, South Africa)**
Senior Backend Engineer *December 2020 –*
 - Working with a fully remote engineering team on the cargo.one air cargo platform.
 - Various technical responsibilities including developing the web application and integrating with external airline systems.
- **Full Stack** **Cape Town, South Africa**
Head of Development *November 2018 – August 2020*
 - Leading Full Stack's development department, which comprises 20-25 developers.
 - High-level oversight of 5-10 separate projects at any given time.
 - Performing a technical leadership role on several projects concurrently.
 - Daily coding and code reviewing.
 - Management duties associated with being a member of the company's management committee.
- **Full Stack** **Cape Town, South Africa**
Software Developer *August 2014 – November 2018*
 - Working in small developments teams, sometimes as a technical lead.
 - Performing code review with team members.
- **Kalahari** **Cape Town, South Africa**
Software Development Intern *June 2014 – August 2014*
 - Working on a small front-end project in a team with other interns.

Education

- **Bachelor of Social Sciences in Philosophy and Economic History** **University of Cape Town**
Cape Town, South Africa *2011 – 2013*

Technologies
